## DETAILED ACTION

### *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 18-42, drawn to a composition comprising an aspartyl dipeptide ester compound and at least one compound selected from the group consisting of sugar, sugar alcohol and oligosaccharide, and method of imparting a sweet taste, classified in class 426, subclass 548.
- II. Claims 43-56, drawn to a product having a bitter taste comprising an aspartyl dipeptide ester compound and a method of correcting the taste of a product, classified in class 426, subclass 548.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
